#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 52-63, drawn to a METHOD for Transferring Substances between the Layers of a Fluid or Gas of Interest

Group II claim(s) 64-76, drawn to a DEVICE or Transferring Substances between the Layers of a Fluid or Gas.

The inventions listed as Groups I & II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they both contain following the technical feature:

ii. at least one receiving layer comprising fluid or gas to which receiving layer or from which receiving layer the substances are transferred,

wherein said fluid or gas of interest within said at least one convective layer is running in a direction parallel to said at least one receiving layer, and wherein fluid or gas in said at least one receiving layers is either:

[[○]] a. stagnant, or

[[○]] b. running in another direction, and/or running with a different speed, when compared to the fluid or gas in the convective layer,

and wherein said substances are transferred to or from said at least one receiving layer without said receiving layers being percolated by said fluid or gas of interest of the convective layer.

which is not allowable as evidenced by US 5,772,900. Accordingly, lack of unity exists.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention. This is in addition to the previously made Election of Species requirement. That Election of Species requirement still stands.

***Comments on the IPER***

Applicant is encouraged to comment on the references applied in the IPER and point out how the instant claims define over that art, or point out where in the record such comments can be found, in order to advance the prosecution of this application.

Any inquiry concerning this communication should be directed to Robert J. Popovics at telephone number (571) 272-1164.
